#### INTRODUCTION

Data from the 2010 Census for the United States and Puerto Rico are presented in two printed report series and a single report for American Indians and Alaska Natives by tribe:

- 1. CPH-1, Summary Population and Housing Characteristics
- 2. CPH-2, Population and Housing Unit Counts
- 3. CPH-3, Characteristics of American Indians and Alaska Natives by Tribe

The data from the 2010 Census were derived from a limited number of basic questions asked of the entire population and about every housing unit. Appendix D (see *Selected Appendixes* report at <www.census.gov/prod/cen2010/cph-2-a.pdf>) presents a facsimile of the questionnaire pages used to collect the data included in this report. Note that the "long form" data included in previous censuses are not included in the 2010 Census.

The CPH-1, *Summary Population and Housing Characteristics*, report series provides data based on age, Hispanic or Latino origin, household relationship, race, sex, tenure (owner- or renter-occupied), and vacancy characteristics. Land area measurements and population density also are provided. This series is similar to the Census 2000 PHC-1 series.

The CPH-2, *Population and Housing Unit Counts*, report series provides 2010 Census and historical comparisons of the population and housing unit counts. It also provides area measurements and density. The user notes section documents geographic changes over the past decade. This series is similar to the Census 2000 PHC-3 series.

In each series, there is one report for each state, the District of Columbia, and Puerto Rico, plus a United States summary report. Many tables in the United States summary reports include data for Puerto Rico.

The CPH-3, Characteristics of American Indians and Alaska Natives by Tribe, report provides population and housing information for selected American Indian and Alaska Native tribes. This report is similar to the Census 2000 PHC-5 report. This is a single report covering the entire United States.

#### HOW TO FIND GEOGRAPHIC AREAS AND SUBJECT MATTER DATA

This report includes a table finding guide to assist the user in locating those statistical tables that contain the desired data. The table finding guide lists alphabetically, by geographic area, the subjects shown in this report. To determine which tables in this report show data for a particular topic, find the subject in the left-hand column of the table finding guide and then look across the columns using the headings at the top for the desired type of geographic area. Figure I-1 is an example of a table finding guide.

The table finding guide does not include cross-classification of subject-matter items. Additional information to locate data within specific reports is provided in the headnote at the top of the table finding guide and in the footnotes at the bottom of the guide.

Figure I-1.

## Table Finding Guide

#### SUBJECTS BY TYPE OF GEOGRAPHIC AREA AND TABLE NUMBER

The types of geographic areas covered in this report are shown on the side, and subjects are shown at the top. See CPH-2-A, *Population and Housing Unit Counts, Selected Appendixes* (<www.census.gov/prod/cen2010/cph-2-a.pdf>), for a description of area classifications (Appendix A) and for definitions and explanations of subject characteristics (Appendix B).

<sup>&</sup>lt;sup>1</sup> State, District of Columbia, or Puerto Rico.

#### HOW TO USE THE STATISTICAL TABLES

#### Parts of a Statistical Table

The census data included in printed reports are arranged in tables. Each table includes four major parts: (1) heading, (2) boxhead, (3) stub, and (4) data field. A typical census report table is illustrated in Figure I-2.

The heading consists of the table number, title, and headnote. The table number indicates the position of the table within the report, while the title is a brief statement indicating the subjects and time reference of the data presented in the table. The headnote is enclosed in brackets and is located under the title. It contains statements that qualify, explain, or provide information pertaining to the entire table.

<sup>&</sup>lt;sup>2</sup> Parish in Louisiana; city and borough, municipality, borough, or census area in Alaska; and municipio in Puerto Rico; in Maryland, Missouri, Nevada, and Virginia, one or more cities are independent of countiles and are treated as statistical equivalents of counties; the entire District of Columbia, which has no counties, is treated as a county equivalent.
<sup>3</sup> County subdivisions within the state are shown alphabetically with places for the following 12 states: Connecticut, Maine, Massachusetts, Michigan, Minnesota, New Hampshire,

County suborisions writin the state are snown aipnabetically with piaces for the following 12 states: Connecticut, maine, massachusetts, michigan, minnesota, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, and Wisconsin.

Figure I-2.

PARTS OF A STATISTICAL TABLE

The boxhead is under the heading. This portion of the table, which contains the individual column heads or captions, describes the data in each vertical column. In the boxhead of many tables, a spanner appears across and above two or more column heads or across two or more lower spanners. The purpose of a spanner is to classify or qualify items below it or separate the table into identifiable blocks in terms of major aspects of the data.

The stub is located at the left edge of the table. It includes a listing of line or row captions or descriptions. At the top of the stub is the stubhead. The stubhead is considered to be an extension of the table title and usually shows generic geographic area designations and restrictions.

In the stub, several features are used to help the user better understand the contents of the table. Usually, a block of data lines is preceded by a sidehead. The sidehead, similar to a spanner, describes and classifies the stub entries following it. The use of indentation in a stub indicates the relationship of one data line to another. Indented data lines represent subcategories that, in most instances, sum to a total. Occasionally in tables, it is desirable to show one or more single-line subcategories that do not sum to the total.

The data field is that part of the statistical table that contains the data. It extends from the bottom of the boxhead to the bottom of the table and from the right of the stub to the right edge of the page.

Both geographic and subject-matter terms appear in tables. It is important to read the definitions of the terms used in the tables because census terms often are defined in special ways that reflect the manner in which the questions were asked and the data were tabulated. Definitions of geographic terms are provided in Appendix A of CPH-2-A, *Population and Housing Unit Counts, Selected Appendixes* (<www.census.gov/prod/cen2010/cph-2-a.pdf>). Census tables often include derived measures such as medians, means, percentages, and ratios. These and other subject-matter terms are defined in Appendix B of the same report.

#### **Symbols and Geographic Abbreviations**

The following symbols are used in the tables and explanations of subjects covered in 2010 Census reports:

- A dash "-" represents zero or a derived measure that rounds to less than 0.1.
- (X) means not applicable. In the 1990 and earlier decennial census reports, three dots ". . . " meant not applicable.
- (NA) means not available.
- The superscript prefix "r" indicates that a Census 2000 count has been revised since the publication of the Census 2000 reports as a result of certified Count Question Resolution (CQR) changes (see also <a href="https://www.census.gov/prod/cen2000/notes/errata.pdf">www.census.gov/prod/cen2000/notes/errata.pdf</a>). This symbol appears only in the 2010 Census CPH-2, *Population and Housing Unit Counts*, report series.
- A minus sign "—" preceding a figure denotes decrease. The minus sign appears only in the 2010 Census CPH-2, *Population and Housing Unit Counts*, report series.

The following are examples of geographic abbreviations and terms that may be used in the tables in this report:

- A "(part)" next to the name of a geographic area in a hierarchical presentation indicates that the geographic entity is located only partially in the superior geographic entity. For example, a "(part)" next to a place name in a county subdivision-place hierarchy indicates that the place is located in more than one county subdivision. (Places also may be "split" by county, congressional district, urban/rural, metropolitan area, voting district, and other geographic boundaries, depending on the presentation.) Other geographic entities also can be "split" by a higher-level entity. The exception is a tabulation block, which is unique within all geographic entities in census products.
- ANVSA is Alaska Native village statistical area.
- ANRC is Alaska Native Regional Corporation.
- CCD is census county division.
- CDP is census designated place.
- CSA is combined statistical area.
- NECTA is New England city and town area.
- Metro Area is metropolitan statistical area.

- Micro Area is micropolitan statistical area.
- OTSA is Oklahoma tribal statistical area.
- SDTSA is state designated tribal statistical area.
- TDSA is tribal designated statistical area.
- UT is unorganized territory.

#### **GRAPHICS**

Charts, statistical maps, and other graphic summaries are included in some 2010 Census reports.

#### **USER NOTES**

User notes include general explanatory information, historical notes, and geographic notes. They also provide information about unique characteristics of the report and sometimes changes or corrections made too late to be reflected in the text or tables themselves. However, sometimes this information becomes available too late to be reflected even in the user notes. Therefore, updates are available in the *Notes and Errata* document at <www.census.gov/prod/cen2010/notes/errata.pdf>.

#### **APPENDIXES**

Appendixes A through D, and F through H, described below, are in the separate printed volume, CPH-2-A, *Population and Housing Unit Counts, Selected Appendixes,* or on the Internet at <www.census.gov/prod/cen2010/cph-2-a.pdf>. Appendix E is included in this report.

**Appendix A, Geographic Terms and Concepts.** Provides definitions of the types of geographic areas and related information used in census products.

**Appendix B, Definitions of Subject Characteristics.** Contains definitions for the subject-matter terms used in census products, including explanations of derived measures, limitations of the data, and comparability with previous censuses. The subjects are listed alphabetically. Population characteristics are defined first, followed by the definitions of the housing subjects.

**Appendix C, Data Collection and Processing Procedures.** Explains the 2010 Census mission and scope and provides thumbnail descriptions of 2010 Census operations.

**Appendix D, Questionnaire.** Presents a facsimile of the 2010 Census questionnaire used to collect the data in this report.

Appendix E, Maps. Contains maps depicting the geographic areas shown in this report.

**Appendix F, Operational Overview and Accuracy of the Data.** Provides information on 2010 Census operations, including group quarters enumeration, confidentiality of the data, imputation of housing unit status and population counts, sources of errors in the data, and data editing.

**Appendix G, Residence Rule and Residence Situations for the 2010 Census of the United States.** Contains a description of the residence rule and residence situations used by Census Bureau staff to guide decisions on where people should be counted in the 2010 Census. This document is the basis for residence-related sections of questionnaires, collection instruments, field materials, and training materials.

**Appendix H, Acknowledgments.** Lists many of the U.S. Census Bureau staff who participated in report preparation.

# Table Finding Guide

### SUBJECTS BY TYPE OF GEOGRAPHIC AREA AND TABLE NUMBER

The types of geographic areas covered in this report are shown on the side, and subjects are shown at the top. See CPH-2-A, *Population and Housing Unit Counts, Selected Appendixes* (<www.census.gov/prod/cen2010/cph-2-a.pdf>), for a description of area classifications (Appendix A) and for definitions and explanations of subject characteristics (Appendix B).

<sup>&</sup>lt;sup>1</sup> State, District of Columbia, or Puerto Rico.

<sup>&</sup>lt;sup>2</sup> Parish in Louisiana; city and borough, municipality, borough, or census area in Alaska; and municipio in Puerto Rico; in Maryland, Missouri, Nevada, and Virginia, one or more cities are independent of counties and are treated as statistical equivalents of counties; the entire District of Columbia, which has no counties, is treated as a county equivalent.

<sup>&</sup>lt;sup>3</sup> County subdivisions within the state are shown alphabetically with places for the following 12 states: Connecticut, Maine, Massachusetts, Michigan, Minnesota, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, and Wisconsin.

# **User Notes**

Additional information concerning this 2010 Census product may become available after this report is published. This information, called *Notes and Errata*, is available in portable document format (PDF) on the U.S. Census Bureau's Internet site at <www.census.gov/prod/cen2010/notes/errata.pdf>.

#### **GENERAL NOTES**

#### **User Note 1**

The user should be aware that there are limitations to many of these data. Please refer to the text provided with this report for further explanation of the limitations of the data. The population and other data shown for the 2010 Census in this report are as of April 1, 2010; the boundaries used for all geographic entities are as of January 1, 2010. All boundaries are intended for Census Bureau statistical data collection and presentation only; their depiction and designation for statistical purposes do not constitute a determination of jurisdictional authority or entitlement. Corrections to the 2010 Census data as a result of certified Count Question Resolution (CQR) changes are available from the Census Bureau's Internet site at <www.census.gov/prod/cen2010/notes/errata.pdf>.

#### **User Note 2**

Data comparability for county subdivisions is shown only when the county subdivision contains substantially the same territory as reported for Census 2000 (generally defined as at least 60 percent of the previous territory). There is no comparability provided for county subdivisions that have been extensively revised. Revised entities are noted by and within county. Changes to a geographic entity can be the result of legal change actions, statistical redefinition, correction of previous boundary or drafting errors, or new erroneous information.

Incorporated place and census designated place (CDP) comparability is provided for all places that retained their name or general area without regard to the amount of territorial change between censuses. Place comparability is not shown if the entity is new for the 2010 Census or is the result of a merger that created an entirely new entity, or if a 2010 Census geographic area shares no area with a Census 2000 area of the same name. American Indian area (including tribal subdivisions), Alaska Native area, and Hawaiian home land comparability follows the same rules as for place comparability.

#### **User Note 3**

When applicable, tables show the revised Census 2000 population and/or housing unit counts that resulted from the Count Question Resolution (CQR) program. These revised counts are accompanied by a prefix "r" symbol in the data tables.

Derived values (e.g., percent distribution, density, or change) that are calculated from Census 2000 population or housing unit counts only account for the aforementioned CQR revisions in certain cases.

- Calculations include the corrected Census 2000 counts when a table:
  - ° Shows population or housing unit change (or percent change) from 2000 to 2010.
  - Shows population or housing unit change (or percent change) from 1990 to 2000, and also shows the 2000 population or housing unit count that it is derived from.
  - Shows population or housing unit density or percent distribution in 2000, and also shows the 2000 population or housing unit count that it is derived from.

User Notes III-1

- Calculations do not include the corrected Census 2000 counts when a table:
  - Shows population or housing unit change (or percent change) from 1990 to 2000, but does not show the 2000 population or housing unit count that it is derived from.
  - Shows population or housing unit density or percent distribution in 2000, but does not show the 2000 population or housing unit count that it is derived from.
- When a table shows component parts of a revised 2000 population or housing unit count (e.g., classified by urban/rural or by size of place), the component parts may not sum to the total population or housing unit count, because the component parts were not revised during the 2000 CQR program. Therefore, any derived values (e.g., percent distribution or number of places by population size) for the component parts cannot account for the revised Census 2000 counts either.

#### **CORRECTION NOTES**

Beardsley city, Big Stone County

Beardsley city should be shown as a separate county subdivision that is independent of any township; it is incorrectly shown as dependent in Browns Valley township.

Browns Valley township, Big Stone County

Browns Valley township should exclude all of Beardsley city; Beardsley city became independent of any township before January 1, 2010. The corrected counts for Browns Valley township (excluding Beardsley city) are 125 population, 67 housing units, a land area of 122,189,978 square meters (47.178 square miles), and a water area of 3,144,673 square meters (1.214 square miles).

Great Scott township, St. Louis County

Great Scott township should exclude all of Kinney city; Kinney city became independent of any township before January 1, 2010. The corrected counts for Great Scott township (excluding Kinney city) are 392 population, 209 housing units, a land area of 151,681,796 square meters (58.565 square miles), and a water area of 2,525,002 square meters (0.975 square miles).

Johnson city, Big Stone County

Johnson city should be shown as a separate county subdivision that is independent of any township; it is incorrectly shown as dependent in Moonshine township.

Kinney city, Big Stone County

Kinney city should be shown as a separate county subdivision that is independent of any township; it is incorrectly shown as dependent in Great Scott township.

Moonshine township, Big Stone County

Moonshine township should exclude all of Johnson city; Johnson city became independent of any township before January 1, 2010. The corrected counts for Moonshine township (excluding Johnson city) are 102 population, 41 housing units, a land area of 96,467,474 square meters (37.246 square miles), and a water area of 46,701 square meters (0.018 square miles).

#### **HISTORICAL NOTES**

The area of Minnesota was partially included in the original territory of the United States, being part of lands ceded by four states to the United States and designated in 1787 as the "Territory northwest of the River Ohio." The United States acquired the remainder of the area from France in 1803 as part of the Louisiana Purchase and by a convention signed with Great Britain in 1818 that extended the northern boundary along the 49th parallel westward from a line drawn due north from the source of the Mississippi River. Minnesota Territory was organized on March 3, 1849, from unorganized area formerly

III-2 User Notes

within lowa and Wisconsin territories. The territory included all of the present-day state of Minnesota, the eastern part of North Dakota and South Dakota, and a small part of Nebraska. Minnesota Territory was reduced in size in 1854 when the portion in present-day Nebraska was included in Nebraska Territory. Minnesota was admitted to the Union on May 11, 1858, as the 32nd state, with generally the same boundary as the present state. The remaining part of Minnesota Territory was not assigned until the organization of Dakota Territory in 1861; in 1860 census reports, the unassigned area was identified as "unorganized Dakota."

#### **GEOGRAPHIC NOTES**

Minnesota is divided into 87 counties. The 2,757 county subdivisions in the state include 1,785 governmentally functioning townships. In 16 counties, some or all of the territory is not organized into townships. In 15 of these counties, the Census Bureau identified 56 unorganized territories for census data presentation purposes. Lake of the Woods County identified 23 nonfunctioning townships for the portion of the county outside of incorporated places. There are 845 incorporated places that are independent of any county subdivision, creating 893 entities that the Census Bureau treats as equivalent to county subdivisions. The Census Bureau identifies three areas in Lake Superior that are not within a county subdivision; these areas are not assigned to any county subdivision and are not counted in the number of county subdivisions.

There are 854 incorporated places and 52 CDPs in Minnesota. Incorporated places in the state are legally described as cities. All but 11 cities are independent of any county subdivision. The Census Bureau treats the 11 cities that are not independent places—Aurora, Beardsley, Calumet, Grand Rapids, Johnson, Kinney, La Prairie, Marble, Nashwauk, Ortonville, and Taconite—and all CDPs as dependent within county subdivisions. [Note: Beardsley, Johnson, and Kinney are erroneously shown as dependent for 2010; see the Correction Notes above.]

#### **GEOGRAPHIC CHANGE NOTES**

The Geographic Change Notes listed below document high-level geographic entities—American Indian areas, Alaska Native areas, and Hawaiian home lands; counties and their equivalents; county subdivisions; and places—that are different from the information reported in Census 2000. The notes identify geographic entities whose name, legal description, and/or boundary have changed, entities that no longer exist, newly established entities (both legal and statistical), and changes in geographic relationships, such as places that exist in one county and have expanded into or withdrawn from another county (the notes do not identify the other county(ies) in which the entity exists; this can be determined from Table 9 of this publication), places that have been removed from comparable 2000 county subdivisions, and places that have become independent of or dependent within one or more county subdivisions. The changes are reported by and within county; counties without changes are not shown in the listing. Changes to American Indian areas, Alaska Native areas, and Hawaiian home lands appear after the list of counties; areas with no changes are not shown. A few of the reported changes in name, legal status, or legal relationship may be incorrect; if so, the correct version is shown in any Correction Notes section above. Some changes are the result of legal actions that took place prior to Census 2000 but were not reported in that census.

For the 2010 Census, the notes reflect any boundary change that affects a geographic entity, regardless of whether it is the result of legal action, redefinition of a statistical entity, correction of a previous drafting error, or new erroneous information. Between Census 2000 and the 2010 Census, the Census Bureau invested in improving the coordinate accuracy of its geographic database. As a result, the geographic positions of boundaries may be different between the two censuses even though little or no change actually occurred to the boundaries. In compiling the Geographic Change Notes, the Census Bureau inspected the many corrections to determine if a change actually affected significant land area or population. For example, the county-level text "all MCDs [minor civil divisions] revised" may reflect a legal redistricting of all county subdivisions in the county, a major or minor relocation of county subdivision boundaries due

User Notes III-3

to more accurate mapping or more accurate boundary information, or a combination of these that, in one way or another, affect every county subdivision in a county. Boundary corrections that resulted in incorporated places gaining or losing territory are shown as annexations or detachments even if no legal action occurred between 2000 and 2010. Most places shown with a detachment resulted from such corrections. In states whose legal entities rarely undergo a legal boundary change, such as the New England states, most of the entities reported to have annexed, detached, exchanged, gained, or lost territory did so as the result of mapping changes, not legal actions. The extent and location of the boundary changes affecting any particular entity can be determined by comparing the TIGER/Line® Shapefiles, Cartographic Boundary Files, or a comparable set of maps for the 2000 and 2010 censuses.

#### Counties, County Subdivisions, and Places

Aitkin County—Annexations from MCDs: Aitkin city from Aitkin township; Hill City city from Hill Lake township; McGregor city from McGregor township; Palisade city from Logan township.

Anoka County—*Incorporations:* Columbus city in 2006 from all of Columbus township; Nowthen city in 2008 from all of Burns township; *Annexations from MCDs:* Bethel city from St. Francis city; Coon Rapids city from Andover city; *Detachments to MCDs:* St. Francis city to Bethel city; Andover city to Coon Rapids city; *New CDPs:* Martin Lake.

Becker County—Annexations from MCDs: Audubon city from Audubon township; Detroit Lakes city from Audubon city (correcting an error in 2000) and Detroit and Lake View townships; Frazee city from Burlington township; Wolf Lake city from Wolf Lake township; Detachments to MCDs: Audubon city to Detroit Lakes city (correcting an error in 2000) and Audubon township; New CDPs: Osage; CDP Changes: Elbow Lake and White Earth CDPs gained area; Pine Point CDP lost area; Deleted Relationships: Pine Point CDP removed from Round Lake township.

Beltrami County—Annexations from MCDs: Bemidji city from Bemidji, Eckles, and Northern townships; Blackduck city from Hines and Summit townships; Funkley city from Hornet township; CDP Changes: Little Rock, Ponemah, and Red Lake CDPs lost area; Redby CDP gained and lost area.

Benton County—*Disincorporations:* Ronneby city in 2009 (added to Maywood township; defined as a CDP in substantively larger boundaries for 2010); *Annexations from MCDs:* Foley city from Gilmanton township; Gilman city from Alberta township; Royalton city from Langola township; St. Cloud city from Minden and Sauk Rapids townships; Sartell city from Sauk Rapids township; Sauk Rapids city from Minden and Sauk Rapids townships and St. Cloud city; *Detachments to MCDs:* Gilman city to Alberta and Gilmanton townships; Rice city to Langola township; St. Cloud city to Minden township and Sauk Rapids city; *New CDPs:* Ronneby (formed from all of disincorporated Ronneby city and additional area).

Big Stone County—Corrections: Beardsley city should be shown as a separate county subdivision and excluded from Browns Valley township; Johnson city should be shown as a separate county subdivision and excluded from Moonshine township; Kinney city should be shown as a separate county subdivision and excluded from Great Scott township; County Changes: Ortonville township, Big Stone County, gained area from Yellow Bank township, Lac qui Parle County, (exclave within Ortonville city); Annexations from MCDs: Graceville city from Graceville township; Additional Annexations: Ortonville city.

Blue Earth County—Annexations from MCDs: Amboy city from Shelby township; Eagle Lake city from Le Ray and Mankato townships; Lake Crystal city from Garden City and Judson townships; Madison Lake city from Jamestown township; Mankato city from Lime and Mankato townships; Mapleton city from Mapleton township; Minnesota Lake city from Danville township; North Mankato city from Mankato city; Pemberton city from Medo township; St. Clair city from McPherson township; Vernon Center city from Vernon Center township; Detachments to MCDs: Lake Crystal city to Judson township; Mankato city to Mankato township; Skyline city to Mankato township; New CDPs: Garden City.

III-4 User Notes

Brown County—Annexations from MCDs: Comfrey city from Bashaw township; Evan city from Prairieville township; New Ulm city from Cottonwood and Milford townships; Sleepy Eye city from Home township; Springfield city from Burnstown township; New CDPs: Searles.

Carlton County—Annexations from MCDs: Moose Lake city from Moose Lake township; New CDPs: Big Lake, Esko, and Mahtowa.

Carver County—Mergers: Chaska township annexed and merged into Chaska city in 2005; Annexations from MCDs: Carver city from Dahlgren township; Chaska city from Chaska (entire area) and Laketown townships; Cologne city from Benton township; Hamburg city from Young America township; Mayer city from Camden, Waconia, and Watertown townships; New Germany city from Camden and Hollywood townships; Norwood Young America city from Young America township; Victoria city from Laketown township; Waconia city from Laketown and Waconia townships; Watertown city from Watertown township; Detachments to MCDs: Mayer city to Camden and Waconia townships.

Cass County—Annexations from MCDs: Backus city from Powers township; Cass Lake city from Pike Bay township; Chickamaw Beach city from Barclay township; Federal Dam from Gould township and North Cass UT; Hackensack city from Birch Lake township; Longville city from Kego township; Pillager city from Sylvan township; Pine River city from Barclay township; Remer city from Lima, Remer, and Slater townships; Walker city from Shingobee township; Detachments to MCDs: Boy River city to Boy River township; Cass Lake city to Pike Bay township; New CDPs: Whipholt.

Chippewa County—Annexations from MCDs: Granite Falls city from Granite Falls township; Milan city from Kragero township; Montevideo city from Sparta township; Detachments to MCDs: Clara City city to Rheiderland township.

Chisago County—Deleted MCDs: Wyoming township parts annexed to Chisago City, Stacy, and Wyoming cities in 2008; Annexations from MCDs: Center City city from Chisago Lake township; Chisago City city from Chisago Lake, Lent, and Wyoming townships; Harris city from Sunrise township; Lindstrom city from Chisago Lake township; Rush City city from Nessel and Rushseba townships; Shafer city from Shafer township; Stacy city from Lent and Wyoming townships; Taylors Falls city from Shafer township; Wyoming city from Wyoming township.

Clay County—Annexations from MCDs: Barnesville city from Barnesville and Humboldt townships; Comstock city from Holy Cross township; Dilworth city from Glyndon and Moorhead townships; Hawley city from Hawley township; Hitterdal city from Highland Grove township; Moorhead city from Glyndon, Moorhead, and Oakport townships; Sabin city from Elmwood township; Ulen city from Ulen township; New CDPs: Baker.

Clearwater County—*MCD Changes:* Long Lost Lake township organized from part of South Clearwater UT in 2005; *Annexations from MCDs:* Bagley city from Copley township; Clearbrook city from Leon township; *New CDPs:* Ebro, Roy Lake (part), and South End; *CDP Changes:* Rice Lake CDP gained area.

Cook County—Annexations from MCDs: Grand Marais city from West Cook UT; New CDPs: Lutsen.

## **Appendixes**

Several appendixes traditionally found in printed reports are now available in a separate volume. For the following, see CPH-2-A, *Population and Housing Unit Counts, Selected Appendixes,* in print or on the Internet at <www.census.gov/prod/cen2010/cph-2-a.pdf>:

Appendix A. Geographic Terms and Concepts

Appendix B. Definitions of Subject Characteristics

Appendix C. Data Collection and Processing Procedures

Appendix D. Questionnaire

Appendix F. Operational Overview and Accuracy of the Data

Appendix G. Residence Rule and Residence Situations for the 2010 Census of the United States

Appendix H. Acknowledgments

This Appendix section contains:

Appendix E. Maps

# Appendix E. Maps

### **Geographic Areas Reference Map Legend**

<sup>&</sup>lt;sup>1</sup> A '\*' following an American Indian area name indicates that tribal subdivisions are defined for that area. The tribal subdivision boundaries are displayed on the tribal subdivision map(s) immediately following the geographic areas reference maps.

Note: All legal and statistical area boundaries and names are as of January 1, 2010. Where international, state, county, independent city, and/or county subdivision boundaries coincide, the map shows the boundary symbol for the highest level of these geographic entities. The county and independent city boundaries are always shown. Where a county subdivision boundary symbol coincides with a place boundary, the map does not show the place boundary symbol. Where American Indian Reservation (State), State Designated Tribal Statistical Area, and/or Tribal Designated Statistical Area boundaries coincide with a county subdivision boundary, the map does not show the county subdivision boundary symbol. Any geographic entity name may include '(pt)' if some portion of the entity extends beyond the limits of the map area displayed on the page, or if multiple discontiguous pieces of the entity have been discretely labeled on the page. A geographic entity name may include '(pts)' if many discontiguous pieces exist for that entity that cannot be discretely labeled. The boundaries shown on this map are for Census Bureau statistical data collection and tabulation purposes only; their depiction and designation for statistical purposes does not constitute a determination of jurisdictional authority or rights of ownership or entitlement.

### **Section Locator**

<sup>&</sup>lt;sup>2</sup> A 'o' following a place name indicates that the place is an independent place or independent city. An independent place is not part of any legal county subdivision and thus serves as the statistical equivalent of a legal county subdivision. An independent city is not part of any county or legal county subdivision and thus serves as both the statistical equivalent of a county and a legal county subdivision. The name for the county subdivision is always the same as that of the place and never shown separately on the map.

## Geographic Areas Reference Map Legend, Section Locator, and Location Index

## **County Location Index**

This list presents the map section numbers for each county in the state. Map section numbers refer to the geographic areas reference maps only.
